

Bluetooth[®] compatibility
Aftermarket kit

Aftermarket kit

Bluetooth[®] compatibility

Lexus Bluetooth[®] Hands-Free system works with Bluetooth[®] enabled phones supporting the Bluetooth[®] Hands-Free profile. However, even though a phone supports the Hands-Free profile, it might not be capable of taking advantage of all the advanced features offered by the Lexus Bluetooth[®] Hands-Free system.

The list provided here describes the level of compatibility of several popular Bluetooth[®] phones.

The listed phones are tested against 3 categories :

- connection features
- call handling features
- phonebook transfer features

The results of the tests are depicted as follow :

- if the test completed successfully
- ✗ if the test failed

CONNECTIVITY

Connectivity testing assesses the capabilities of each phone to establish a connection with Lexus Hands-Free system :

Pair and connect - Ability of the phone to be linked with Lexus Hands-Free system

Auto connection - Ability of the phone, once registered in Lexus Hands-Free system, to automatically establish connection with the vehicle

PHONEBOOK

Phonebook testing assesses the capabilities of each phone to transfer phonebook data from the phone to the Hands-Free system :

Bulk transfer - Ability of the phone to transfer all of the address book contacts to the Hands-Free system in one single transfer operation

One entry at a time - Ability of the phone to transfer a single address book contact to the Hands-Free system

CALLS

Call handling testing assesses the capabilities of each phone to support incoming and outgoing calls and additional features related to Hands-Free communication :

Incoming call - Ability of the phone to accept or reject an incoming call to the Hands-Free system

Outgoing call - Ability of the phone to place and end an outgoing call from the Hands-Free system

Voice dialling - Ability of the phone to dial a number from the voice dialling interface of the Hands-Free system

Redialling - Ability of the phone to redial the last dialled number

Audio transfer - ability of the phone to transfer a call from the Hands-Free system to the phone and from the phone to the Hands-Free system
